OVERSEAS ASSIGNMENTS

KSA (Saudi Arabia)
- ELECTRICIANS
- MECHANICAL TECHNICIANS
- ANVIL PULLERS
- FABRICATION SUPERVISORS
- SCAFFOLDERS
- PIPE FITTERS
- MECHANICAL SUPERVISORS
- FABRICATION FOREMEN
- PLANT MAINTENANCE MANAGERS
- HVAC DEPARTMENT

Bahrain
- ELECTRICAL TECHNICIANS
- MECHANICAL TECHNICIANS
- ELECTRICAL SUPERVISORS
- MECHANICAL SUPERVISORS
- MECHANICAL ENGINEERS
- MECHANICAL FOREMEN
- ELECTRICAL FOREMEN
- ELECTRICAL SUPERVISORS

UAE (United Arab Emirates)
- ELECTRICAL ENGINEERS
- MECHANICAL ENGINEERS
- ELECTRICAL SUPERVISORS
- MECHANICAL SUPERVISORS
- ELECTRICAL FOREMEN
- MECHANICAL FOREMEN
- ELECTRICAL TECHNICIANS
- MECHANICAL TECHNICIANS

Brunei
- ELECTRICAL ENGINEERS
- MECHANICAL ENGINEERS
- ELECTRICAL SUPERVISORS
- MECHANICAL SUPERVISORS
- ELECTRICAL FOREMEN
- MECHANICAL FOREMEN
- ELECTRICAL TECHNICIANS
- MECHANICAL TECHNICIANS

Oman
- ELECTRICAL ENGINEERS
- MECHANICAL ENGINEERS
- ELECTRICIANS
- MECHANICAL TECHNICIANS
- ELECTRICIANS
- MECHANICAL FOREMEN
- ELECTRICIANS
- MECHANICAL TECHNICIANS

Kuwait
- ELECTRICIANS
- MECHANICAL TECHNICIANS
- ELECTRICIANS
- MECHANICAL SUPERVISORS
- ELECTRICIANS
- MECHANICAL TECHNICIANS
- ELECTRICIANS
- MECHANICAL TECHNICIANS

Govt initiative to promote use of renewable energy

A amidst the growing energy needs and changing global climate dynamics, the central government has identified new areas to achieve higher levels of generation of renewable energy by proposing certain amendments to the Energy Conservation Act, 2001. The objective will be to enhance demand for renewable energy at the industrial sectors including industries, buildings, transport, etc. The Ministry of Power has prepared amendments, after consultations with key stakeholders. The proposal includes defining quantum share of renewable energy in the overall consumption by the industrial units or any establishment. There will be provision to incentivize efforts on using clean energy sources by means of carbon saving certificate.

To review the act in detail, four stakeholder consultation meetings were conducted with various stakeholders to discuss and receive inputs on the possible amendments. Further, to the discussion and stakeholder consultations, the amendments have been proposed to strengthen the institutions originally envisaged under the act, said the ministry. The proposed amendments will facilitate development of carbon market in India and prescribe minimum consumption of renewable energy, either as direct consumption or indirect use through grid. This will help in reduction of fossil fuel-based energy consumption and carbon emissions in the atmosphere.

India stands at the forefront of addressing climate change and has contributed to an ambitious Nationally Determined Contributions (NDCs) of reducing emission intensity by 33-35 per cent in 2030 against the levels in 2005. The country is committed to achieve more than 45 per cent cumulative electric power installed capacity from non-fossil fuel energy resources by 2030.

Furthermore, by adopting energy-efficiency measures, India holds the potential to reduce about 100 MT carbon dioxide by 2030. The proposed changes to the act will boost the adoption of clean technologies in various sectors of economy. The provisions would facilitate promotion of green hydrogen as an alternate to the existing fossil fuels used by the industries.

The additional incentives in the form of carbon credits against deployment of clean technologies will result in private sector investment in the sector. The proposal also includes expanding the scope of act to include larger residential buildings, with an aim to promote sustainable habitat, the ministry said.

“The need for energy is inevitable and with the changing business landscape, it has become even more imperative to address the nation’s need to become energy-efficient without putting further pressure on the environment. With the amendments made, the focus is to empower institutions to contribute for our Paris commitments and fully implement the National Action Plan in a timely manner,” added the ministry.
